

# SWAT Mosquito Misting System Guarantees Mosquito-free Homes

**IN AS LITTLE AS TWO WEEKS, HOMEOWNERS WILL BE ABLE TO ENJOY THEIR BACKYARDS INSECT-FREE**

Now that the rainy season is here, South Florida is about to experience another active mosquito infestation. Officially slated to begin May 15 and last through Oct. 15, South Floridians have something else to prepare for besides hurricanes - an ambush of mosquitoes that will disrupt evenings spent outside relaxing by the pool, entertaining or playing with our kids in the backyard. According to the American Mosquito Control Association, mosquitoes are not only annoying, but also a serious problem. They interfere with work and spoil hours of leisure time. Throughout the world, there are over 2500 different species of mosquitoes, and about 200 species reside in the United States alone, with 77 species residing in Florida.

*Steve Jenkins, President of SWAT Mosquito Systems, provides customers with a quality product, stands behind the expertise of his staff, and ensures excellent customer service.*

Fortunately for homeowners and businesses, a new local company - SWAT Mosquito Systems - is ready to keep people, children and pets safe from each and every species.

## HOW DOES SWAT MOSQUITO SYSTEMS' "MISTING SOLUTION" WORK?

Homeowners spend thousands of dollars beautifying their yards by landscaping, installing expensive pools and elaborate entertainment areas - only to find out that they cannot enjoy their new amenities without the constant barrage of mosquitoes and other biting insects. SWAT creates a mosquito-free barrier around your home, pool and backyard by installing a customized system of nickel-plated and stainless steel nozzles, which are strategically placed underground or along the eaves, fences, gutters, wrought iron fences and columns in order to "mist" pyrethrum - the company's most popular botanical solution, two-to-four times a day for 30 - 60 second intervals. Pyrethrum is derived from the dried flowers of chrysanthemums, it directly affects the nervous system of biting insects - killing rather than repelling them. No other solution can claim such a long record of proven safety towards humans and warm-blooded animals. SWAT also offers a Rosemary-based solution made up of essential plant extracts and oils; it is the company's 100 percent USDA National Organic Compliant alternative. "SWAT can wipe out your mosquito problem in as little as two weeks - ensuring peace of mind and restoring the ability to enjoy the outdoors," Steve Jenkins, President of SWAT Mosquito Systems. "When you choose SWAT Mosquito Systems, you can be confident of worry-free, insect-free enjoyment of your outdoor spaces for years to come.

## "WHO IS BEHIND SWAT MOSQUITO SYSTEMS?"

Jenkins holds a bachelor's degree in electrical engineering from Southern Methodist University. He stumbled upon automated misting systems in late 2002 and went on to establish the highest grossing mosquito-misting company in Northern Texas. Co-founders Wylie Davis and Damon Cook helped launch the mosquito misting business with Jenkins over four-years ago

*Co-Founder Wylie Davis customizes each mosquito-misting system to be highly effective yet virtually invisible, "At SWAT Mosquito Systems, we are experts and industry pioneers who use the most technologically advanced, durable equipment available."*

and are bringing their expertise to the South Florida region. The company's mission is to provide customers with quality product, the expertise of our staff, and the responsiveness of our customer service. SWAT is locally owned and operated, its employees are trained and certified to install and service the SWAT Mosquito System.

## WHAT IS THE SWAT DIFFERENCE?

South Florida-based SWAT Mosquito Systems takes a customer-centric approach to business. SWAT is a licensed pest control operator with Florida's Department of Agriculture and the most experienced mosquito-misting company in the state.

"At SWAT Mosquito Systems, we are experts and industry pioneers who use the most technologically advanced, durable equipment available," said Wylie Davis, Co-founder of SWAT Mosquito Systems. "We custom design each system to be highly effective yet virtually invisible, ensuring an aesthetically pleasing yard." SWAT Mosquito Systems is "the original" system, with a fully automated digital display panel. It is the only system of its kind to incorporate a level-sensing float switch, agitator, and 3-button remote control. "Even solutions that have emulsifiers, which are designed to keep the products in suspension, separate over time," added Davis. "With an agitator, the solution stays well blended for a consistent, even spray every time."

## DOES SWAT OFFER ITS CUSTOMERS A WARRANTY?

"We offer the most comprehensive guarantee in the business," said Damon Cook, Co-Founder of SWAT Mosquito Systems. "Our lifetime warranty covers all parts and labor

for full service customers. If you are not fully satisfied with the system within 120 days of installation, we will remove the system and give you a complete refund." Any home or business owner concerned about biting insects can benefit from SWAT Mosquito Systems. They are the premier provider of residential and commercial misting systems for the elimination of mosquitoes, no-see-ums, and other biting insects. Contact SWAT to combat your mosquito and pest problem at 1-866-900-SWAT or visit:

### Testimonial 1:

We have been using the SWAT Mosquito-Misting System and my family has reclaimed our yard from those pesky mosquitoes. I am proud to say that my family is Finally mosquito-free.

*Hank and Barbara Kinney, satisfied homeowners. Customer service was excellent*

### Testimonial 2:

My husband and I are really impressed with the level of customer service we received from SWAT Mosquito Systems they were excellent. I would recommend the SWAT

Mosquito-Misting System to anyone, especially if you have young children. Our grandchildren love to splash around in the pool for hours and now they can do so without the fear of being eaten alive by mosquitoes. SWAT has truly given us peace of mind.

*Henry and Connie Walters, satisfied homeowners*
